- **IP addressing-IIT kgp**
  12week Ip addressing course by nptel iit kharagpur under the guidence of prof. Bhattacharya.

Projects

- 1. Vehicle management app through appian
    - We have built an acme application using appian technology for rental vehicle management systems under the guidance of prof. Arun sir there we have worked on groups ,security,data types,interface,process model,graph chart all these aspects we featured into our application.
    - Used technology _ java, mysql, mariadb, appian cloud
- 2. Blockchain implementation in social media
    - We have build a project on blockchain which is based on ethiruim technology wheere can controll over spoof,fraud,and fake content through our token based implimentation of blockchain.
    - Ethereum was the true boom for this tech as it Social media is one such field . Many people won't find any problem regarding their regular social media applications, but even though they can't deny the fact about data gathering processes followed by them and data leaks of huge numbers of users. Apart from these, problems like fake profile generation .all these thibgs we can easily reduce to its minimum level.

Interests

- Playing cricket
- Reading self help books
- Writing poetries

Languages

- English
- Hindi
